

Your crypto strategy & inputs for investments

Find out how you can invest profitably in cryptocurrencies in simple steps and generate additional income or even become independent.

The start of your crypto strategy

Understanding

Get a comprehensive insight and immerse yourself in the fascinating world of cryptocurrencies with my online courses.

Mindset

Your attitude towards cryptocurrencies and the secure storage of your assets are crucial for a successful investment.

Investment

Many investors dream of earning a passive income or even being independent with cryptocurrencies.
This can become a reality!

You can find out what you need to know to navigate this exciting market safely and what strategy I follow in the personal training sessions.

Step 1- Understand digital financial systems and cryptocurrencies

Your future starts with knowledge.
You have to invest in yourself before
you invest your money!
Never invest in something you don't
understand!
If you want to invest profitably in
cryptocurrencies, you need to
understand them.

With my online courses, you will
build up a solid basic knowledge
and understand which aspects are
important in order to invest
successfully.
You will also find YouTube
channels that I personally follow to
keep up to date with the crypto
market. This will pay off for you in
the future.

Take the time to go through the tables of
contents of my courses.
In the first course Bitpanda, Bitvavo and
Blockpit you will learn everything you need
to successfully sign up and invest.
But before you do that, I recommend you
consolidate your knowledge by working
through the other courses and checking
your knowledge with the test at the end.

The step-by-step structure takes
you from Bitcoin knowledge for
beginners to the comprehensive
topics you need to know in the
crypto market.
Don't make the mistake of
investing in any projects without
knowledge, as this will cost you
money in the long run.

Invest in sound and
successful projects - the
courses show you how.

Step 2 – Mindset

Your crypto success doesn't just come to you.
You need knowledge, perseverance and patience.

Develop a strategy and set yourself goals.
Have you thought about whether there is a way to invest in cryptocurrencies with as little risk as possible?
Think that's not possible?

I will convince you otherwise with my strategy, let me surprise you.
In personal training, we will take time to work out your strategy and I will help you to develop the best approach for you.

Before investing, you should think about the storage of your cryptocurrencies.
It is just as important to familiarise yourself with the trading platforms and their regulation.
A wallet is a place where you can store your cryptocurrencies securely.
You can find all the information you need in my courses.

Step 3 – Investment

Pay attention to these points with your trading platform:

- User-friendliness
- user interface
- support
- Investable assets
- Analysis tool
- Fees

My suggestions for your investments:
Bitpanda, Bitvavo and for advanced users Bitget

These points will help you when buying cryptocurrencies:

- Pay attention to market capitalisation
- The team behind the project
- Follow the development
- Diversification of currencies
- Fundamental analysis
- View the respective whitepaper
- Favourite crypto exchanges already provide you with the information you need for each coin.

Cryptocurrencies can be used to generate passive income in various ways, such as mining, staking, lending and many more. The important thing is that you understand the process and choose the method that best suits your investment goals and risk tolerance.

Bitcoin – Halving

The Bitcoin Halving is a unique event that takes place every four years. The event reduces the reward for miners and has led to significant price increases in the past.

If you understand this event, you can profit from it.

Checklist

What you need to consider when buying cryptocurrencies

- Reputable provider
- the right platform
- Which wallet
- your goals
- method
- Analysis tool
- support
- Real-time quotes
- fees
